

DATA SECURITY

Origin Intelligence Inc. (collectively “Origin,” or “We,” “Us.” Or “Our”) uses innovative technology to enhance our connection with our clients.

Our systems are built upon proven technology and enterprise software framework to ensure it meets the requirements of the most security-sensitive organizations. Just like enterprise software and banking institutions, our systems are GDPR compliant and utilize the strongest industry recognized security, including TLS 1.2 with AES 256-bit SSL encryption.

All client data is redundantly stored multiple times in multiple physical locations to ensure the highest level of data integrity and the entire network is housed in SAS70 Type II data centers.

To give notice, or if you have any questions or comments about data security, please contact us.
